

Is saline irrigation water damaging your farm?

Irrigation water with high:

Problems in your soil, crops & irrigation system

- Saline soil conditions
- Compacted soils
- Poor soil health
- Slow water infiltration & run-off
- Leaf burn & soil toxicity
- Lower yield & quality
- Clogged irrigation systems
- Corrosion

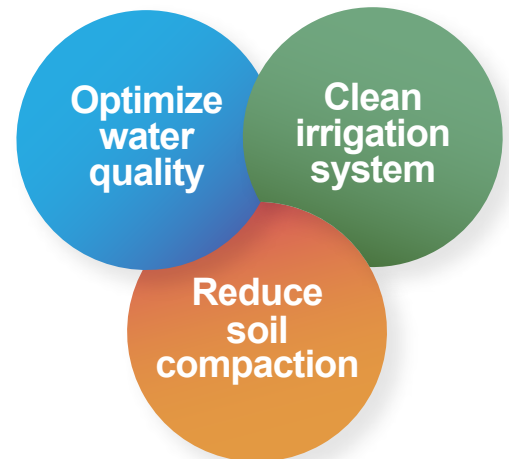

The Puricare Unit is:

- 💧 Cost-effective
- 💧 Proven
- 💧 Reliable
- 💧 Sustainable
- 💧 Environmentally friendly
- 💧 Continuous & Automatic

A solution that will:

Puricare water treatment will make your irrigation water work for you!

Don't let saline irrigation water limit your farm's potential!

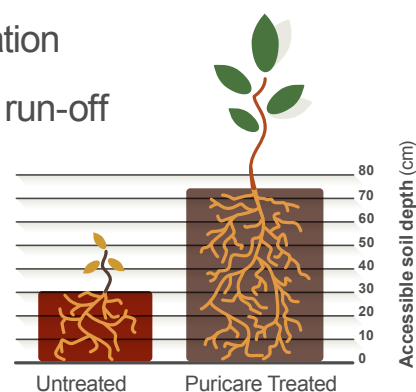

Unlock your water!

Improve the **physical, chemical & biological** properties of your irrigation water!

- 💧 Negative effects of saline water are reduced
- 💧 Salt dissolution makes calcium more available
- 💧 Oxidized chlorides & metals are less toxic
- 💧 Useful conversion of carbonates & sulphates

Unlock your soil!

- 💧 Promote soil decompaction & aeration
- 💧 Improve water infiltration & reduce run-off
- 💧 Facilitate the mobility of salts, chlorides & metals down the soil profile
- 💧 Increase the volume of soil profile supporting healthy root growth

Unlock your roots!

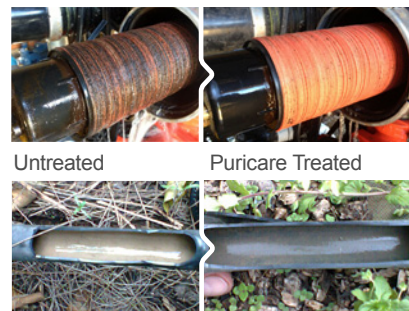

- 💧 Aerated, healthy root zones
- 💧 Prolific, deeper, active roots
- 💧 Improve water & mineral uptake

Root growth without Puricare Root growth with Puricare

Unlock your irrigation system!

- 💧 Keep it continuously & automatically clean
- 💧 Prolonged irrigation system lifespan
- 💧 Ensure uniform water & fertilizer delivery

Contact Puricare and unlock the potential of your irrigation water!
